

Mellifont Abbey by Night

This week's club night was a field trip to Mellifont Abbey. As we set off from the clubrooms at 20:00, it was very dark when we arrived. The idea of the trip was to try out, with all participating club members, some of the techniques we had tested at Salterstown a few weeks ago. This entailed lots of burning steel, some lasers and light painting of the old ruins. Lots of dangerous fun was had and a special thanks to Andrew for being brave enough to stand under the green umbrella!
